[Github Profile](#) | [Portfolio](#)

I am enjoying building responsive and user-friendly websites. I want to improve my skills, work on real projects, and be part of a team where I can learn and grow as a developer.

Projects

1. Fresh Alert - Food Expiry Tracker

A food management web app where users can keep track of stored food items, get expiry alerts and take personal notes .

[Live Site](#) | [Github\(client\)](#) | [Github\(server\)](#)

Key Features :

- Add, update, and delete food items with expiry dates and personal notes
- Real-time expiry countdown for each item
- Search and filter food items by name or status
- Responsive design all devices with secure backend (Express.js + MongoDB + JWT)

2. GreenHub - Gardening Community

A full-stack gardening community app where users can explore, add, and manage gardening-related resources like tips.

[Live Site](#) | [Github\(client\)](#) | [Github\(server\)](#)

Key Features :

- Users can add, update, and delete gardening items
- Private dashboard with user-specific item management
- Search, filter, and responsive design
- Frontend using react.js & backend powered by Express.js and MongoDB

Technical Skills

- **Language** : HTML, CSS, JavaScript (Basic)
- **Libraries & Frameworks** : React.js, TailwindCSS, DaisyUI
- **Tools** : Git, Github, Firebase (Authentication)
- **Hoisting** : Firebase, Vercel, Netlify
